

AWS Task-4

Task Description:

Launch an EC2 instance (Linux and Windows) along with a web server. Then, create an EBS volume of 5 GB, attach it to an EC2 machine (Linux and Windows), and take a snapshot. Finally, create an EBS volume using the taken snapshot.

Solution:

✓ 1. Launch EC2 Instance (Linux + Windows)

The screenshot shows the AWS Management Console's EC2 Instances page. A table lists two instances: 'Windows-VM' (i-018cc12f3ad20d219) and 'Ubuntu-VM' (i-006df616644a8cdd7). Both are in a 'Running' state. The 'Ubuntu-VM' instance is selected, and its details are shown below the table, including its Instance ID, Public IPv4 address (13.204.79.35), and Private IPv4 addresses (172.31.14.135).

The screenshot shows the AWS Management Console's EC2 Instances page. A table lists two instances: 'Windows-VM' (i-018cc12f3ad20d219) and 'Ubuntu-VM' (i-006df616644a8cdd7). Both are in a 'Running' state. The 'Windows-VM' instance is selected, and its details are shown below the table, including its Instance ID, Public IPv4 address (3.110.47.129), and Private IPv4 addresses (172.31.1.207).

- Successfully created EC2 Instances for Linux and Windows.

✓ 2. Install Web Server

The screenshot shows a web browser displaying the Apache2 Default Page on an Ubuntu server. The page features the Ubuntu logo, the text 'Apache2 Default Page', and a button that says 'It works!'.

- Connected to the Linux EC2 instance using SSH.
- Then, I installed Apache web server.

- Connected to the Windows EC2 instance using RDP.
- Then, installed the IIS web server.

✓ 3. Create EBS Volume of 5 GB

- Created an EBS volume of 5 GiB from the Elastic Block Store.

✓ 4. Attach EBS Volume to EC2

- Selected the created EBS volume and attached it to my Linux EC2 instance.

- Used device name `/dev/xvdbf`.

```
root@ip-172-31-14-135:~# lsblk
NAME        MAJ:MIN RM  SIZE RO TYPE MOUNTPOINTS
loop0       7:0      0  27.2M 1 loop /snap/amazon-ssm-agent/11320
loop1       7:1      0  73.9M 1 loop /snap/core22/1981
loop2       7:2      0  50.9M 1 loop /snap/snapd/24505
xvda        202:0    0    8G  0 disk
├─xvda1     202:1    0    7G  0 part /
├─xvda14    202:14   0    4M  0 part
├─xvda15    202:15   0   106M 0 part /boot/efi
└─xvda16    259:0    0   913M 0 part /boot
xvdbf       202:14592 0    5G  0 disk
root@ip-172-31-14-135:~#

root@ip-172-31-14-135:~# mkdir /mnt/mydata
root@ip-172-31-14-135:~# mount /dev/xvdbf /mnt/mydata
root@ip-172-31-14-135:~# df -h
filesystem      Size  Used Avail Use% Mounted on
/dev/root        6.8G  2.0G  4.8G   30% /
tmpfs            479M   0  479M    0% /dev/shm
tmpfs            192M  892K  191M    1% /run
tmpfs            5.0M   0   5.0M    0% /run/lock
/dev/xvda16     881M   66M  734M   11% /boot
/dev/xvda15     105M   6.2M   99M    6% /boot/efi
tmpfs           96M   12K   96M    1% /run/user/1000
/dev/xvdbf       4.9G   24K   4.6G    1% /mnt/mydata
root@ip-172-31-14-135:~#
```

- Then I connected to the Linux EC2 instance, formatted, and mounted the volume for testing.

- Selected the EBS volume and attached it to my Windows EC2 instance.

- Logged in via RDP, opened Disk Management, initialized the new disk, formatted it, and assigned a drive letter.
- The volume was successfully attached and usable.

✓ 5. Take Snapshot of the Volume

Create snapshot Info

Create a point-in-time snapshot of an EBS volume and use it as a baseline for new volumes or for data backup. You can create snapshots from an individual volume, or you can create multi-volume snapshots from all of the volumes attached to an instance.

Source

Resource type Info

☒ **Volume**
Create a snapshot from a specific volume.

☐ **Instance**
Create multi-volume snapshots from an instance.

Volume ID
The volume from which to create the snapshot.

vol-021fc880d86cc267 (5GB Volume)

Snapshots (1/1) Info

☒	Volume Snap	snap-055529bcfab6fb0ab	152 MIB	5 GiB	MyVolume-Snap	Standard	Completed

- Created a snapshot of the EBS volume from Volumes.

✓ 6. Create New EBS Volume from Snapshot

Create volume Info

Create an Amazon EBS volume to attach to any EC2 instance in the same Availability Zone.
